

Clevertouch screen cleaning method

1. Preparation

- Gloves: No special requirements
- Cleaner: Sprayway detergent, Model: 50 (recommended), Isopropyl based screen cleaner
- Glass cleaning cloth: anti-dust, lint-free or microfiber cloth

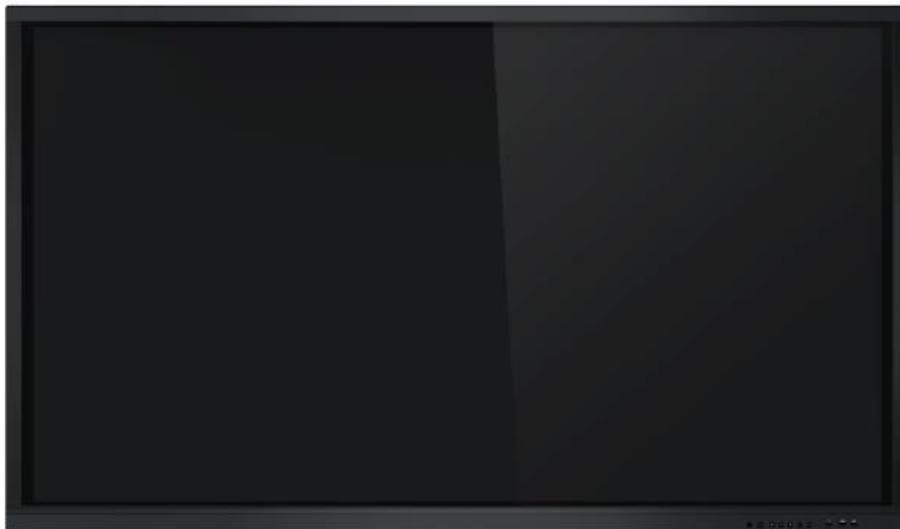

2. The method of wiping the screen

- Turn the screen off and unplug the power cable. Do not just put the screen into sleep mode.
- Please wear gloves
- Shake up and down the glass cleaner, and spray on the cloth, never directly on the glass surface as there is a risk of moisture getting into the touch frame at the bottom of the screen
- Use a glass cleaning cloth to wipe the screen gently in the same direction, and then wipe the screen with dry cloth to remove any marks

CLEVERTOUCH

- The effect after cleaning

Important notes:

- Turn off the device before cleaning
- Do not use acidic corrosion solvent
- Do not use water
- When wipe the screen, please wipe gently along the same direction
